

GUTSENSE - CERTIFIED ORGANIC PROBIOTIC FOR DOGS

A NEW GENERATION PROBIOTIC AND DIGESTIVE SUPPORT FOR DOGS.

WHAT MAKES GUTSENSE SO MUCH BETTER THAN OTHER DIGESTIVE FORMULAS? HERE ARE 6 REASONS:

1. **GutSense is certified organic!** You know how much I hate chemicals and pesticides. They destroy nature and health.
2. **Nothing is sourced from China.** GutSense is made in the United States in a human natural product certified facility that uses a patented probiotic dairy free manufacturing process from Italy.
3. **GutSense is a probiotic formula custom made specifically for dogs.** Most k9 probiotics are made of human probiotic bacteria strains. GutSense is different. I have meticulously cherry picked each probiotic strain to reflect the natural microflora of dogs, NOT humans.
4. Unlike most probiotics, **GutSense comes with prebiotics**—the food that is essential for probiotic bacteria to flourish and thrive.
5. **Certified organic dandelion** is another great source of chlorophyll and has a positive effect on digestive function and the liver.
6. **Organic cilantro** has been added in the mix to help eliminate mercury and other heavy metals.

2 CAPSULES OF GUTSENSE CONTAINS:

Lactobacillus acidophilus 150 Bill CFU/GM

Lactobacillus Plantarum 100 Bill CFU/GM

Lactobacillus Reuteri 100 Bill CFU/GM
