

Omega-3 DHA

OMEGA-3 DHA OIL

Our daily Omega-3 supplement is an eco-friendly Algae based highly concentrate DHA oil that is Essential for a healthy companion.

- A Pure, plant based vegetable source
-
- No risk of harmful toxins
- No environmental damage

DHA is one of the primary building blocks of the brain and is a vital supplement for your pet, especially for dogs, cats or horses with chronic inflammation and itching. Our Omega-3 DHA supplement is derived from Algae (not fish oil) and targets and soothes the root causes of inflammation, resolving chronic diseases including dermatitis, inflammation due to ear infections, inflammation due to periodontal issues or arthritis.

A daily dose of our Omega-3 supplement will improve

Brain Function: Pets learn quicker and are easier to train.

Visual Ability: Improved eyesight.

Brain support for the degenerative senior brain

Eases arthritis and joint pain

Improved renal function (kidney support)

Reduced risk of heart disease

Soothes skin inflammation/irritation

Joint and arthritis pain support

Cancer management

Calms pet allergies

Please remember to keep your Omega-3 oil in the refrigerator to protect the DHA Content

Omega-3 DHA

DHA (docosahexaenoic acid) is a polyunsaturated fatty acid that animals only synthesize in small quantities and therefore must be supplied through food or food supplements. DHA plays a crucial role in supporting brain function and resolving inflammation in animals, including dogs, cats and horses.

The control of inflammation is important for many acute and chronic diseases such as dermatitis, otitis, periodontitis or arthritis. Traditional veterinary medications for inflammation only control symptoms and fail to treat the root of the problem. Recently discovered mediators derived from DHA (resolvins or protectins) play a critical role in resolving and healing inflammation.

Fatty fish and fish oils are growing in popularity for their health benefits. But it is the fish's food source that should be getting all the attention. Fish rich in Omega-3s have their natural algae diet to thank.

We have chosen to go straight to the source.....no fishy smell and no fishy taste.

We use a quality and sustainable source from algae with a high DHA content, 350 mg. Relying on fish and fish oil as a primary source of omega-3 DHA has two major problems: toxicity and sustainability. The oceans have become more contaminated with industrial and human waste like heavy metals (mercury) and chemicals (polychlorinated biphenyl and other pesticides

By feeding your best friend a sustainable supplement, you are helping to protect our environment.

Please remember to keep your Omega-3 oil in the refrigerator to protect the DHA Content.

Omega-3 DHA

Dosage

With Omega-3 it is important to know that they are absorbed by the dog's gastrointestinal tract after ingestion.

Dosage: Recommended dosage is 2 drops for every 20lb of weight.

Dog/Cat Weight	Number of Drops per Day
Up to 20 lbs	2 drop
20 -- 40 lbs	4 drops
40 – 60 lbs	6 drops
60 -- 80 lbs	8 drops
80 -- 100 lbs	10 drops
100 – 120 lbs	12 drops

Please remember to keep your Omega-3 oil in the refrigerator to protect the DHA Content.
